

# QUALIMIN-M

Combination of Well Balanced Minerals and Probiotics

The growth and performance of shrimp, prawn and fish in culture systems are purely depended by environmental conditions. The most important element which has to be monitored in day to day aquaculture is quality of the water. Good Aquaculture Practices (GAP) advices 'Cultivating water is must for aquaculture' and emphasizes the importance of water quality management in aquaculture. To keep water properties within safe levels we came up with Multi-mineral formulation product called- **Qualimin-M**.

**Qualimin-M** works very effectively for any mineral imbalance in high density stocked ponds. Qualimin is the only one destiny for mineral deficiency in feeds as well as in aquaculture ponds. Qualimin helpful in osmoregulation and nutrient transfer to the cells, which aid in the growth and development of aquaculture.

**Qualimin-M** provides essential amino acids for better growth and maximize the productivity by optimizing Feed Conversion Ratio (FCR).

## KEY BENEFITS

- Improves disease resistance and defense mechanism, which will help it grow better and faster.
- Optimises feed intake and maximize the productivity.
- It Improves the health and yield of the culture.
- It helps in uniform growth in improve hormonal and enzymatic activities in aquaculture.
- Quality mineral mixture with essential amino acids for better productivity and growth.
- Protects from loose shell syndrome (LSS)
- It helps osmosis regulation of body fluids in fish and shrimp.
- Optimises immunity, body resistance, overall productivity and livability.

## DOSAGE SCHEDULE

Normal Condition : 1-2 kg per Ton of Feed

Diseases Condition : 2-3 kg per Ton of Feed

Or else as advised by aquaculture consultant

## Composition: Each 1 Kg Contains

Cobalt	: 0.150 gm
Zinc	: 9.6 gm
Calcium	: 240 gm
Phosphorous	: 120 gm
Manganese	: 3.5 gm
Copper	: 2.0 gm
Selenium	: 10 gm
DI Methionine	: 1.92 gm
L Lysine Monohydrochloride	: 4.4 g
Potassium	: 0.100 gm
Sodium	: 5.9 mg
Magnesium	: 6.0 gm
Sulphur	: 9.2 gm
Iron	: 5.0 gm
Iodine	: 0.325 gm
Probiotics	: Qs

## VEDAAS BIOSCIENCES

Category-1, Plot No. 20/B, Block-31,
