

# VEN SACCH

Live Inactivated yeast

The ban of antibiotic growth promoters in feed for production of animal foods across the world has increased interest in evaluating the effect of yeast products (YP) on the gastrointestinal ecosystem, rumen microbial populations and overall animal performance. **VenSacch** is a feed ingredient produced from a high quality *Saccharomyces cerevisiae* yeast cell wall. **VenSacch** provides the nutritional platform to sustain the animal growth and reduces fluctuation in pH and keeps gastrointestinal active.

**VenSacch** works as a best solution to safeguard all livestock animals and see the performance of farmed aquaculture species as well as supporting environmental quality, in a natural way. **VenSacch** comprises Boulardil grown in a medium consisting of wheat bran, ground corn, sugar, molasses & other nutrients. **VenSacch** is the dried product composed of yeast and the media on which it was grown, dried in such a manner as to preserve a fermenting activity of the yeast.

## KEY BENEFITS

- It provides digestion of Feed.
- Better weight gain and improves FCR.
- Improves Gut fermentation.
- Maintains pH and strong health population of fiber digestion bacteria.
- Increases milk yield.

## COMPOSITION

*Saccharomyces cerevisiae* and boulardil cells not less than  $2.5 \times 10^{9CFU}$ /GM.

## STORAGE CONDITIONS

Proteins, Fats, Fiber, Vitamins, Amino Acids, Minerals and digestible enzymes.

## DIRECTION OF USE

Dairy Animals	:	30-50 gm per animal.
Poultry	:	500gms – 1kg per tonne of feed.
Fish/Prawn	:	1 kg-2 kg per tonne of Feed or as advised by the consultant.

**Keep in a cool and dry place protect from direct sunlight**

Registered and Approved by  
CAA under Antibiotic – Free Product  
CAA No : CAA/SEP18/FA/02541

## VEDAAS BIOSCIENCES

Category-1, Plot No. 20/B, Block-31,  
Autonagar, Rangareddy Dist., Hyderabad
